Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

None of the prior art made of record teaches or suggests a method for lighting surfaces in a rendering system comprising the steps of:

providing a scene database including a polygon having a polygon surface represented by three-dimensional vectors;

providing a light source defining a three-dimensional light source direction vector;

providing a bump map;

rotating the light source direction vector to a (3D) polygon orientation at each vertex;

interpolating the rotated light source direction vector at each vertex;

calculating, using dedicated pixel shading computer hardware, a lighting equation to provide a shading value for substantially each drawn pixel residing on the polygon surface using the bump map and the interpolated light source direction vector, the dedicated computer hardware configured to produce a shading value using linear calculations and only mathematical functions selected from the group of addition, subtraction, multiplication and division whereby a display signal incorporating the shading values is generated without using a square root calculation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

-Ikedo (5,900,881) discloses a computer graphics circuit for rendering light-reflected images based on a bump-mapped Phong-shading model implemented fully in hardware, comprises a span processor, a bump-mapping circuit, a reverse-projection circuit, a bump-normal RAM, and Phong-shading circuit.
